findinsite-cd feature list

findinsite-cd is a search engine for your CD, DVD or USB memory stick

findinsite-cd highlights words in web pages

findinsite-cd is customisable to match your site

findinsite-cd is fast because it uses a pre-built search database of words

Free version searches up to 60 files

[Retail version prices](#) from US\$99 to US\$999

- 🔍 **Search engine:** A full-text search engine for your CD, DVD or USB memory stick:
 - Enter text into a search box
 - **findinsite-cd** displays a results list
 - Click to show a result, with word highlighting in web pages

- 🔍 **File types:**
 - [HTML](#) web pages - 32 character sets supported
 - Adobe [PDF](#)
 - Word [DOC/RTF](#) and [DOCX](#)
 - Excel [XLS](#) and [XLSX](#)
 - PowerPoint [PPT/PPS](#) and [PPTX](#) presentations
 - [TXT](#) plain text
 - [JPEG/TIFF](#) image meta-data

- 🔍 **Technology:**
 - Platform-independent Java applet for browsers - [Get a Java VM](#)
 - Check [compatibility](#) and [XP SP2](#) pages

- 🔍 **Highlighting:**
 - **Highlights** found search words in displayed web pages
 - Jumps straight to first occurrence on web page

- 🔍 **Indexing:** Use [findinsite-cd-wizard](#) Windows tool to:
 - Index your CD contents to build a search database
 - Build a search page and copy in the runtime
 - Edit the search database
 Alternative [findex](#) Java application indexer available: this also indexes [RDF/XML](#) meta-data

- 🔍 **Languages:** **findinsite-cd** detects the user's preferred language and presents results using that language
 - Currently, 29 Western, Arabic and Asian languages are supported
 - More languages can be supported

日本語 简体中文 繁体中文

- 🔍 **Search features:**
 - Logical searches AND OR NOT ()
 - Full wild card support
 - Word stemming and synonyms using [rules](#)
 - Multiple [indexes and subsets](#) supported
 - Meta-data [field searches](#)

-  **Screen options:**
- Either use an [applet window on the page](#)
 - Or use [HTML forms and JavaScript page updating](#) pages
 - Shows hits in same window, new window or within framesets
 - Configurable fonts, colours, layout and ordering
 - Adjustable results listings
 - Programmable using [JavaScript](#)

-  **Use online:**
- **findinsite-cd** will run on Intranet sites and online but may be slow
 - Use alternative [findinsite-ms](#) for ASP.NET based sites
 - Or [findinsite-js](#) for Java server sites

What they say

Please see our [Awards and Reviews](#) page for download reviews etc.

From: Melvin Portillo, Honduras.

Date: 22 Jul 2008

*Thanks a lot.
I am very happy with your product and your support I`ve recommended it with all my friends...*

From: Issa Diao, USA.

Date: 25 Jun 2008

*Hey... I just wanted to let you know that I really like your program, but I was even more impressed with you getting back to me quickly, and with the amazingly thorough and helpful instructions on your website.
I had considered a few other search programs (most notably DT Search) but for all the reasons above, I went ahead and bought a standard license from you today.*

From: Piero Carra, Italy.

Date: 9 Jan 2008

Chris, thank you very much for your excellent support. I think I was able to solve, in some way, the customer problem

From: Ed, RellerGold, USA.

Date: 03 May 2007

*... and now it runs like it's supposed to run! It falls to me to convince the management that we need to pay for all this technology. Given the degree of customer service you provide I hope it will be an easy sell.
Having once been in the business of recruiting salesmen and women and sales engineers in telecom I was even more impressed by your responsiveness.*

From: Andrew Hallett, Triangle Infotech Ltd, UK.

Date: 26 Jan 2006

Thanks for all your prompt and excellent help on resolving this. It is very much appreciated and your product is meeting my expectations. Have always wanted to

offer searchable CDs (with no install), and having fingered fiscd a couple of years ago I'm pleased the opportunity arose to use it on a real project.

From: Maurice Jorgens, United Nations, USA.

Date: 14 Mar 2005

Thanks for your efforts and I AM spreading the word about what good products you have!

From: Nathan, Notcon Internet, UK.

Date: 21 Jan 2005

Many thanks for your hard work. Our client is most impressed by both how easy the FindinSite-CD software is to use and by the speed with which you implemented the changes that they requested to the software. Excellent customer service.

From: jsoulsby, The Netherlands.

Date: 29-Jul-2004

This is truly a great product. When we wanted to publish our Management System Documentation website to a CD, this was the only product at the time that allowed you to add a search facility to the CD. Search is a critical requirement and was provided by this product in a user-friendly and cost-efficient manner.

From: Michael Bademann, Western Systems Informationssysteme GmbH, Germany.

Date: 16 Jun 2004

*well done ☺
OUR ORDER WILL BE PLACED IN THE NEXT WEEK. THANKS FOR BEST SUPPORT!!!*

From: Paul Croome, Software AG, Germany.

Date: 2 Dec 2003

Yesterday I was explaining the latest features of fisCD to a colleague who is still using an older version of the software (V3.x), and once again I realised what an excellent package it is. From my point of view, it's a brilliant blend of your best ideas, gently spiced with the results of constructive dialogue about features that we wanted to see. It's unbeatable! Keep it up!

From: Paul Croome, Software AG, Germany.

Date: 4 Mar 2002

Thanks again for your excellent work on Findex and for the enjoyable and very productive cooperation. Findex is the tool that we have been waiting for, it is already bringing us real benefits in our day-to-day documentation production.

From: Martijn Cox, Fource Consulting, The Netherlands.

Date: 6 Nov 2001

Many thanks! PPT-scanning works perfectly!

From: Fernando Nunes, Imprensa Oficial, Macao.

Date: 24 Jul 2001

Congratulations for this great job...

From: Al Cushon, courtlink.com, USA.

Date: 13 Jun 2001

I must say that this product looks way cool.

From: Mark Banks, CH2M.com, USA.

Date: Mon, 5 Feb 2001

Just wanted to say that I have been REALLY impressed with the quality of this product and the number of enhancements being made. I think this is an awesome product, and I recommend it to anyone/everyone who asks about it. Thanks!

From: Sarah MacKinnon, Dissemination division, Statistics Canada.

Date: Fri, 27 Oct 2000

I love your product!

From: Michael Higgins, Omega Engineering, Inc., USA.

Date: Mon, 14 Aug 2000

The new version of FindinSite-CD works great. I like the way the words are highlighted in the html pages.

From: Julian Calvert, Documentation Coordinator, Software AG, Germany.

Date: Fri, 7 Jul 2000

I'm currently evaluating FindinSite CD 3.0 and I must say I'm very impressed, particularly with the highlighted and hyperlinked hits and the ability to customise the search results.

...

Once again - excellent work.

From: Don Chipman, Team Leader, Baseline Training Maintenance Project, Cisco, USA.

Date: Tue, 23 May 2000

...we chose FindinSite-CD because it met our immediate needs and is easy to use.

From: Michael Seely, President, CIMWorld, USA.

Date: Mon, 27 Mar 2000

We just released the second version of the CD with the search function. We are starting to get very positive feedback. The users like it. Thanks....

From: Paul Croome, Software AG, Germany.

Date: Thu, 25 Nov 1999

FindinSite-CD-Wizard is an unqualified success. It is a great product, and it is a pleasure to use it to run through a large web (approx. 1,500 HTML files) in a couple of minutes.

From: Melanie Wilkens, FundSERV Inc., USA.

Date: Tue, 20 Jul 1999

So far, I am favourably impressed with FindinSite-CD. It has shown definite advantages over the other stand-alone search engines I've tried. It has worked on most platforms (Windows95, Windows NT, MAC, UNIX ... at least with a version 4 or later browser) and via both URL and file access. There were a few odd results on a MAC...but this was appearance more than function... and only using IE (Netscape worked fine).

From: Bill Lawrence, ANSYS, Inc., USA.

Date: Tue, 2 Mar 1999

I had no trouble indexing our documentation set. I have our documentation group using the full-text search of our documentation set to see if we can find any problems. So far, so good. I must say that this is the very best of the Java-based search tools that I've found. I expect that you'll be hearing from us about licensing in the near future.

From: Nadia Nabaoui, University of Hamburg, Germany

Date: Thu, 3 Dec 1998

Super! It runs. I cannot believe it. Thank you very much.

From: Dennis Mansker, Employment Security Department, State of Washington, USA

Date: Mon, 23 Nov 1998

On the basis of the ease of use, the "look and feel" issues, and the cost, your product was the clear winner.

From: Colleen Moran, Newport Electronics, Inc., USA

Date: Fri, 16 Oct 1998

I really appreciate the help you have given us.
