PRESS RELEASE – FOR IMMEDIATE RELEASE   15 February 2010

PHDCC adds new software to its CD and USB publishing range

PHDCC.com has just released Dynamic-CD.Net, a software wizard that transfers Windows .NET websites to CD or USB stick in just a few clicks.

PHD Computer Consultants Ltd (PHDCC) director Chris Cant says, "A CD-based website is an excellent promotional tool - or can serve as a valuable freebie at the end of a conference, giving delegates all the conference material on a plate. Dynamic-CD is used by many company reps to take their website with them on the road, freeing them from the hassle of finding a wireless connection."

What can be put on a data CD can also be put on a DVD, USB memory stick or laptop. Early corporate adopter of Dynamic-CD.Net, Pete Mooney from Cincinnati USA says, "What used to take an hour to set up I can now do in 30 seconds by handing clients a flash drive. Thank you for designing an excellent product!"

Earlier versions of Dynamic-CD run ASP and PHP based web sites.   Dynamic-CD.Net extends this support to ASP.NET websites. Full product information and technical advice is available at www.phdcc.com/dynamic-cd.

PHDCC offers a range of software products for e-media: ShellRun is a professional AutoPlay tool that shows a menu of options on CD startup, FindinSite-CD provides a search facility, while Conference-CD presents a set of PowerPoint presentations with search and menus.

Well-known names around the world rely on PHDCC products, including The World Bank, The London Underground, Interpol and Capgemini Financial Services,Hong Kong. Closer to home, PHDCC has produced a video DVD with an embedded web site for the local Bampton history society.

PHDCC also offers a custom CD development service. For example, the International Research Council on the Biomechanics of Injury (IRCOBI) based in Switzerland has used PHDCC's services for the last two years to produce its annual conference proceedings CD with special keyword handling.

Formed in 1994, PHDCC is based in Bampton, Penrith, Cumbria, England, UK. Please get in touch with director Chris Cant on 01931 713196 for more information or via www.phdcc.com.
